VENGEANCE

Shield

VENGEANCE™ Series with Tridextrous™ Handle Threat Level: IIIA Platform: WMX1

The **VENGEANCE™ Series** hard armor shield has been designed from the ground up with direct input from federal law enforcement agents. Two features include the patent pending **VENGEANCE™ Viewport** and **Elzetta Tridextrous™ Handle system**

The exclusive **VENGEANCE™ Viewport** maintains a wide field of view when compared to standard rectangular viewports while enhancing lower peripheral vision giving a clear forward view of obstacles and trip hazards.

The patent pending **Elzetta Shield Light with Tridextrous™ Controls** is the only fully integrated system designed with three distinct grip surfaces and light activation at each position for intuitive operation.

The **WMX1** is a weapon mount upper shield platform designed for maximum coverage with a tapered lower that improves mobility in narrow passageways. Never has so much advanced technology been incorporated into a single hard armor shield.

STANDARD FEATURES

VENGEANCE™ exclusive Patent Pending Viewport

- Ambidextrous weapon mount design
- Hybrid Composite Ballistic Construction
- Ambidextrous Molded High Density Foam Forearm Pad
- Black COREBOND™ integrated DURACOLOR™
- Durable Edge Wrap Protection
- NIJ 0108.01 IIIA Rated

Elzetta Shield Light with Tridextrous™ Controls

- Steady 1000 Lumen output does not dim during mission
- Solid Acrylic Optical Flood Lenses provide natural "wall of light"
- Circuit Redundancy retains light output if one side is damaged
- Fully potted electronics for extreme durability
- Intuitive master cap battery lock-out
- Multi-Position adjustable forearm cuffs
- High-frequency strobe option
- Made in USA

STANDARD SIZES

- 18x30
- 20x34
- 24x36
- 24x48
- Custom sizes available for quote

OPTIONAL FEATURES
