THEATRE RIFLE-RATED SHIELD

ASTM Level RF1

THEATRE Protective ballistic shields were early in the industry to achieve ASTM verification at the RF1 protection level. This standard establishes more demanding ballistic performance requirements compared to legacy test protocols. Verification includes a minimum 19-shot test sequence, including required clustered impacts, to validate real-world threat resistance. All shield components are additionally evaluated following thermal shock, water submersion, and extreme temperature exposure to confirm consistent protective performance under operational conditions.

FEATURES

- ◊ ASTM E3347/E3347M certified Threat Level RF1
- ◊ Tested in accordance with ASTM multi-angle, multi-shot ballistic protocols, with performance verified after submersion and extreme environmental conditioning
- ◊ Weapons mount shape
- ◊ Finished with a black polyurea coating for increased durability
- ◊ Robust viewport geometry engineered to maximize optical clarity and situational awareness
- ◊ Bumper edge guards for added drop protection
- ◊ Custom-molded high-density foam pad
- ◊ Unappareled, high-performance fastener configuration to withstand angled and proximity shots
- ◊ Heavy-duty padded forearm strap
- ◊ El Zetta flat-bar handle with lighted and non-lighted options

Sizes & Weights

17"x30"	without light	17.6 lbs	7.89 kgs
	with light	19.5 lbs	8.84 kgs
20"x30"	without light	19.1 lbs	8.66 kgs
	with light	21 lbs	9.52 kgs
20"x36"	without light	22.6 lbs	10.52 kgs
	with light	24.5 lbs	11.11 kgs

Color

Option

- ◊ Carry bag
- ◊ Agency ID placards
