MULTI-HIT SPALL

Containment Sleeve

Constructed with high-performance ballistic fibers, this sleeve contains spall generated by a steel plate on impact, keeping fragmentation where it belongs, inside the sleeve, not in the wearer's face or neck. Engineered for multi-hit performance, it holds up to three shots per threat without compromising containment. Fits over any steel plate and is compatible with any body armor carrier.

100% NYLON OUTER COVER

FEATURES

- ♦ Multi-hit performance
- ♦ Constructed with layers of high-performing ballistic materials
- ♦ Utilizes 100% nylon outer cover for long term performance
- ♦ Lightweight, sleek design
- ♦ Bottom loading with high-strength, hook-and-loop closure
