FEATURES

The US Army Ballistic Combat Shirt (BCS) combines the comfort and functionality of a combat shirt with ballistic fragmentation and flame-resistant protection. Designed to be worn beneath the Modular Scalable Vest (MSV), t features integrated yoke and collar ballistic protection and removable deltoid ballistic inserts for shoulder and upper-arm coverage. Moisture-wicking fabrics with no-melt/no-drip properties and foam elbow pads covered with flame-resistant fabric complete the design.

- **Ballistic Fragmentation Protection:** Coverage at the upper arms and shoulders, with integrated yoke and collar ballistic protection.
- **Removable Deltoid Inserts:** Removable ballistic inserts provide upper-arm protection.
- **Flame-Resistant Construction:** Flame-resistant sleeves and non-ballistic fabrics with no-melt/no-drip properties.
- **Moisture-Wicking Fabric:** Non-ballistic materials provide moisture-wicking performance.
- **Elbow Padding:** Foam elbow pads covered with flame-resistant fabric.
- **Unisex and Female-Specific Designs:** Available in a standard unisex design and a female-specific design featuring a flared waist and hip area, shorter sleeves, and a ballistic collar cutout to accommodate a hair bun.
- **MSV Integration:** Designed for wear beneath the Modular Scalable Vest.
